EDUCATION

The Chinese University of Hong Kong (CUHK) — Hong Kong, HK

Sep 2023 – Mar 2027

Bachelor of Science in Computer Science — CGPA (Cumulative Grade Point Average): 3.281 / 4.000

- Focus areas: web development, full-stack applications, and software engineering
- Relevant coursework: Data Structures, Algorithms, Database Design, Web Application Development

SKILLS

Programming Languages: JavaScript, Python, Java, SQL (Structured Query Language), Ruby, C, HTML/CSS, VBA (Visual Basic for Applications)

Frameworks & Libraries: React, Node.js, Express.js, Next.js, Ruby on Rails, Bootstrap

Databases: MongoDB, Oracle Database, MySQL, PostgreSQL, Firebase Realtime Database

Tools & Technologies: Git, GitHub, Docker, Vercel, Heroku, Google Maps API, Dify, RAGflow, Microsoft Office

WORK EXPERIENCE

Civil Aviation Department — Air Traffic Management Department

Jul 2025 – Aug 2025

Technical Support Intern

- Built a Visual Basic for Applications (VBA) reporting system that automated air traffic performance analysis, replacing manual data processing and generating real-time charts and visual summaries for management review
- Developed an internal AI assistant (ICAO Chatbot — International Civil Aviation Organization) using Dify with Retrieval-Augmented Generation (RAG) to enable secure document retrieval and natural-language queries across internal documentation

PROJECTS

Hong Kong Cultural Events Platform / React, Express.js, MongoDB, Vercel, Google Maps API

- Developed a full-stack web platform displaying cultural events across Hong Kong with real-time updates and location-based discovery
- Integrated the Google Maps Application Programming Interface (API) to visualize event locations and streamline user navigation
- Implemented backend services and MongoDB schemas to manage event data and support responsive user interactions

Mock-Fund League / Ruby on Rails, PostgreSQL, Python, RESTful API, Docker, OAuth, Heroku

- Built a mock-trading web platform with secure OAuth (Open Authorization) authentication, league and portfolio management, and leaderboard features
- Designed RESTful APIs for trades, league membership, leaderboard, and stock data retrieval, supporting scalable backend integration
- Containerized the application with Docker and deployed to Heroku for consistent runtime environments across development and production

EXTRACURRICULAR ACTIVITIES

The Resident Association of Student Hostel II, Shaw College, CUHK — Committee Member

Feb 2024 – Jan 2025

ShawLane25, Shaw College, CUHK — Administrative Department

Mar 2025 – Oct 2025

ShawLane24, Shaw College, CUHK — Promotion Department

Mar 2024 – Oct 2024

Gotta Go! Sustainable Explorer Challenge, Hong Kong Express — Participant

Feb 2025 – Mar 2025
